PROJECTS

SkillSphere – Community & Event Management Platform| GitHub

Dec 2025 – Jan 2026

- Built a full-stack MERN platform enabling users to create hobby-based groups, register and manage events, and communicate via group and global anonymous chat, fostering collaborative communities.
- Developed a social media-style dashboard with post creation, likes, and comments, along with real-time messaging to enhance user engagement and interaction.
- Implemented a robust admin panel to manage users and groups, moderate chats, restrict community actions, create contests, and enforce platform security and control.
- **Tech Stack:** Node.js | Express.js | React.js | MongoDB | JavaScript | HTML | CSS

PrepHub – Interview Preparation Platform | GitHub

Nov 2025 – Dec 2025

- Instituted an online resume builder that enables individuals to create organised profiles with adjustable sections, well-structured entry fields, and instant preview panels tailored to personal presentation preferences.
- Constructed the application using Node.js, Express.js, JavaScript, HTML, and CSS, designing the interface so users can smoothly reposition details, easily revise content, and reliably export documents across different devices.
- Delivered strong results by reducing resume preparation time by 45%, lowering layout inconsistencies by 50%, and supporting over 500 generated files through robust document creation features.
- **Tech Stack:** Node.js | Express.js | JavaScript | HTML | CSS

Podcast Recommender System | GitHub

Mar 2025 – Apr 2025
